

Notes to Consolidated Financial Statements

Years ended March 31, 2018 and 2017

1. BASIS OF PRESENTATION

Yamaguchi Financial Group, Inc. (“YMFG”) is a holding company for The Yamaguchi Bank, Ltd. (“Yamaguchi Bank”), Momiji Bank, Ltd. (“Momiji Bank”), The Kitakyushu Bank, Ltd. (“Kitakyushu Bank”) and other subsidiaries.

YMFG and its consolidated subsidiaries (“the Group”) maintain their accounts and records in accordance with the provisions set forth in the Financial Instruments and Exchange Law and its related accounting regulation and in conformity with accounting principles and practices generally accepted in Japan (“Japanese GAAP”). Japanese GAAP are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards.

The accompanying consolidated financial statements are a translation of the audited consolidated financial statements of YMFG which were prepared in accordance with Japanese GAAP and were filed with the appropriate Local Finance Bureau of the Ministry of Finance as required by the Financial Instruments and Exchange Law.

In preparing the accompanying consolidated financial statements, certain restructuring and reclassifications have been made in the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan.

The consolidated financial statements are stated in Japanese yen. The translations of the Japanese yen amounts into U.S. dollars are included solely for the convenience of readers, using the prevailing exchange rate at March 31, 2018, which was ¥106.24 to U.S.\$1.00. Such translations should not be construed as representations that the Japanese yen amounts have been, could have been, or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

2. SIGNIFICANT ACCOUNTING POLICIES

Consolidation and equity method

(1) Scope of consolidation

Japanese accounting standards on consolidated financial statements require a company to consolidate any subsidiaries of which the company substantially controls the operations, even if it is not a majority owned subsidiary. Control is defined as the power to govern the decision making body of an enterprise.

- (i) 16 consolidated subsidiaries at March 31, 2018 and 2017.

The names of the main consolidated subsidiaries are listed on page 1.

The scope of consolidation includes YM Life Planning Co., Ltd., due to its establishment in the fiscal year ended March 31, 2017. In addition, the newly established YM Life Planning Co., Ltd. acquired all shares in HOKEN HIROBA Co., Ltd. Accordingly, HOKEN HIROBA is included in YMFG’s scope of consolidation from the fiscal year ended March 31, 2017.

- (ii) One unconsolidated subsidiary at March 31, 2018 and five at March 31, 2017.

Name of major subsidiary:
Maple Funding Corporation

The unconsolidated subsidiaries are excluded from the scope of consolidation because their total assets, ordinary income, net income (in proportion to ownership), retained earnings (in proportion to ownership) and accumulated other comprehensive income are so immaterial that they do not hinder a rational judgment of YMFG’s consolidated financial position and results of operations when excluded from the scope of consolidation.

(2) Application of the equity method

Japanese accounting standards also require any unconsolidated subsidiaries and affiliates with financial and operating policies over which YMFG is able to exercise material influence to be accounted for by the equity method.

- (i) No unconsolidated subsidiaries were accounted for by the equity method at March 31, 2018 and 2017.
- (ii) As at March 31, 2018, two affiliates were accounted for by the equity method (three as at March 31, 2017).

Affiliates as at March 31, 2018 were as follows:

YM Saison Co., Ltd.

Momiji Card Co., Ltd.

As at March 31, 2017, three affiliates were accounted for by the equity method. Affiliates as at March 31, 2017 were as follows:

YM Saison Co., Ltd.

Yamaguchi Capital Co., Ltd.

Momiji Card Co., Ltd.

Due to the sale of some shares in Yamaguchi Capital Co., Ltd., YMFG's percentage of ownership decreased. Consequently, the company was removed from the scope of application of the equity method.

- (iii) As at March 31, 2018, one unconsolidated subsidiary was not accounted for by the equity method (five as at March 31, 2017).

Name of major subsidiary:

Maple Funding Corporation

The unconsolidated subsidiaries that are not accounted for by the equity method are also excluded from the scope of application of equity method because their net income (in proportion to ownership), retained earnings (in proportion to ownership) and accumulated other comprehensive income (in proportion to ownership) are so immaterial that they do not hinder a rational judgment of YMFG's consolidated financial position and results of operations when excluded from the scope of equity method.

- (iv) There were no affiliates that were not accounted for by the equity method as at March 31, 2018 and 2017.

(3) The balance sheet dates of consolidated subsidiaries

The balance sheet date of consolidated subsidiaries is as follows:

March 31 16 companies

(4) Accounting Policies

Trading assets, trading liabilities and transactions for trading purposes

The valuation method of "Trading assets" and "Trading liabilities" is as follows:

Balances incurred by transactions of which the purpose is to earn a profit by taking advantage of short-term fluctuations in a market or discrepancies in different

markets of interest rates, currency exchange rates, share prices or other indices (hereinafter referred to as "trading purposes") are included in "Trading assets" or "Trading liabilities" in the consolidated balance sheets as of the date on which the transactions have been contracted.

The income or losses on these transactions are recorded as "Trading income" and "Trading expenses" in the consolidated statement of income.

Trading assets and trading liabilities are valued, in the case of securities and commercial paper, at the market value as of the date of the balance sheet and, in the case of derivatives, including swaps, futures and options, at the amount due if the transactions were to be settled as of the date of the balance sheet. "Trading income" and "Trading expenses" include interest income and interest expense, respectively, and gains and losses, respectively, resulting from the valuation of securities, commercial paper, derivatives, etc., which are included in "Trading assets" or "Trading liabilities."

Securities

With regard to the valuation of securities, held-to-maturity debt securities are stated at amortized cost (straight-line method) using the moving-average method. Investments in unconsolidated subsidiaries that are not accounted for by the equity method are stated at cost determined by the moving-average method. Available-for-sale securities are in general stated at fair value (cost of sale calculated primarily according to the moving-average method) indicated according to market price at the consolidated balance sheet date (for equity securities, the average market price during the one-month period ending on the consolidated balance sheet date). Available-for-sale securities having no readily available market value are valued at cost using the moving-average method.

Unrealized gains (losses) on available-for-sale securities are reported as a component of net assets.

Money in trust

Trust assets within money held in trust are valued using the market value method.

Derivatives

Derivatives other than those for trading purpose or those for which exceptional accounting treatment is applied are stated at fair value.

Method of hedge accounting

The subsidiaries that conduct banking business (“the Banks”) apply deferred hedge accounting in accordance with “Treatments of Accounting and Audit on Application of Accounting Standard for Financial Instruments in Banking Industry”(The Japanese Institute of Certified Public Accountants (“JICPA”) Industry Audit Committee Report No. 24, February 13, 2002). As for the hedge to offset market fluctuation, the Banks assess the effectiveness of the hedge by grouping the hedged items such as deposits and loans and the hedging instruments such as interest rate swaps by their maturity.

Also, the Banks apply deferred hedge accounting to hedge foreign exchange risks associated with various foreign currency denominated monetary assets and liabilities as stipulated in “Treatment of Accounting and Auditing Concerning Accounting for Foreign Currency Transactions in Banking Industry” (JICPA Industry Audit Committee Report No. 25, July 29, 2002). The effectiveness of the currency swap transactions, exchange swap transactions and similar transactions hedging the foreign exchange risks of monetary assets and liabilities denominated in foreign currencies is assessed based on comparison of the foreign currency position of the hedged monetary assets and liabilities and the hedging instruments.

The Banks apply an exceptional accounting treatment, as permitted if certain conditions are met, for certain interest rate swaps utilized as hedging instrument. In that treatment, the interest swap contracts are not recorded at fair values but the net interest to be paid or received under the contracts is added or deducted to the interest arising from their related hedged assets or liabilities.

Allowance for loan losses

The Banks provide allowance for loan losses according to the following write-off and provisioning standards.

For loans to borrowers who are legally bankrupt (due to bankruptcy, composition, suspension of transactions with banks by the rules of clearinghouses, etc.) or substantially bankrupt, an allowance is provided in the amount of loans, net of amounts expected to be collected through disposition of collateral or through execution of guarantees.

For loans to borrowers in danger of bankruptcy, an allowance is provided in the amount considered uncollectible based on the amount of loans, net of

amounts expected to be collected through disposition of collateral or through execution of guarantees, and other sources.

Loans to normal borrowers and borrowers requiring caution are classified into certain groups, and an allowance is provided for each group using the rate of loan losses experienced for the Banks during certain reference periods in the past.

Each branch as well as the credit supervision department evaluates all loans in accordance with the self-assessment rule.

Other consolidated subsidiaries provide an allowance for an amount calculated using the rate of collection losses in the past for loans of normal borrowers in addition to amounts estimated based on collectability analysis for borrowers in danger of bankruptcy and certain other borrowers.

Tangible fixed assets (excluding lease assets)

Depreciation of tangible fixed assets of YMFG and its consolidated subsidiaries that conduct banking business are computed by using the declining-balance method except for buildings (excluding fixtures) acquired after April 1, 1998 and fixtures and buildings acquired after April 1, 2016, which are depreciated using the straight-line method.

The estimated useful lives of the assets are primarily as follows:

Buildings: 7 to 50 years

Others: 3 to 15 years

Other consolidated subsidiaries depreciate their tangible fixed assets using mainly the declining-balance method over the useful lives of the respective assets provided by the Corporation Tax Act in Japan.

Intangible fixed assets (excluding lease assets)

Amortization of intangible fixed assets is computed by using the straight-line method. Software costs for internal uses are amortized over the estimated useful life (5 years).

Lease assets

Lease assets included within tangible and intangible fixed assets related to finance lease transactions that do not transfer ownership are depreciated over the lease term using the straight-line method. For lease assets with a guaranteed residual value stated in their lease agreements, the residual value is set at the guaranteed amount.

Otherwise, the residual value is assumed to be zero.

Income taxes

Income taxes comprise corporate, enterprise and inhabitant taxes. The Group recognizes tax effects of temporary differences between the financial statement basis and the tax basis of assets and liabilities. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences.

Foreign currency translation

Foreign currency assets and liabilities and the accounts of overseas branches of YMFG and consolidated subsidiaries are translated into yen at the rates prevailing at the consolidated balance sheet date.

Provision for bonuses

Provision for bonuses is provided for payment of bonuses to employees, in the amount of estimated bonuses that are attributable to the fiscal year.

Method of accounting for retirement benefits

When calculating retirement benefit obligations, the benefit formula method is used for attributing expected retirement benefits to periods through the year-end. The methods for recognizing past service cost and actuarial gains or losses are as follows:

Past service cost: Recognition of past service cost is apportioned by the straight-line method over a fixed number of years (2 years) within the employees' average remaining service period from the time of their occurrence

Actuarial gains or losses: Recognition of actuarial gains or losses are apportioned by the straight-line method over a fixed number of years (Mainly 10 to 11 years) within the employees' average remaining service period at the time of their occurrence in each fiscal year, starting from the following fiscal year

Some consolidated subsidiaries employ the simplified method for calculating retirement benefit obligations

and periodic benefit costs, stating retirement benefit obligations at the amounts required as if all employees voluntarily terminate their employment as of the year-end.

Provision for directors' retirement benefits

The provision for directors' retirement benefits for consolidated subsidiaries outside the banking business is provided for the estimated amount corresponding to accrued retirement benefit payments to directors as of the end of the fiscal year.

Standards for recording provision for directors' stock benefits

To prepare for the provision of YMFG's shares distributed to directors of YMFG and the Banks (excluding directors who are also Audit and Supervisory Committee members, part-time directors and outside directors; hereinafter, "Subject Directors"), the provision for directors' stock benefits is recorded based on the expected value of stock benefit obligations as of the balance sheet date, in accordance with directors' stock benefit regulations formulated by YMFG and the Banks.

Provision for loss on interest repayment

Provision for loss on interest repayment is provided for possible losses on reimbursements of excess interest payments and loan losses related to consumer finance loans extended at interest rates in excess of the maximum interest rate prescribed in the Interest Rate Restriction Law.

In accordance with "Audit Guidelines on Consumer Finance Companies' Provisions for Possible Losses on Reimbursements of Excess Interest Payments," issued by JICPA in 2012, the amount of such provision is rationally estimated and booked based on actual historical repayment claims by debtors.

Provision for reimbursement of deposits

Provision for reimbursement of deposits is provided for in order to meet depositor requests for reimbursement on deposits already derecognized as liabilities, in an amount deemed necessary by estimating the losses corresponding to the expected requests for reimbursements in the future.

Provision for customer point services

Provision for customer point services is provided in conjunction with a point system to promote credit card use. The provision is recorded for the expected cost to be incurred when credit card members use points they have received as of the balance sheet date.

Reserves under special laws

Reserves under special laws consist of the financial instruments transaction responsibility reserve posted by YM Securities Co., Ltd., which were calculated according to the specified formula of Article 46-5 of the Financial Instruments and Exchange Act and Article 175 of the Cabinet Office Order Related to the Financial Instruments Business, to prepare for future eventual losses originating from incidents relating to the purchase and sale of securities or other transactions.

Amounts per share of common stock

Computations of net income per share of common stock are based on the weighted-average number of shares outstanding during each year.

Cash dividends per share represent the cash dividends declared as applicable to each year.

Amortization of goodwill

Goodwill is amortized mainly over a 10-year period using the straight-line method.

Consumption taxes

YMFG and its consolidated subsidiaries employ the tax exclusion method for consumption tax and local consumption taxes, meaning that transaction amounts and consumption tax amounts are treated separately for accounting purposes.

However, non-deductible consumption taxes for purchase of property, plant and equipment are recognized as expenses for the year of the purchase.

Adoption of consolidated tax payment system

YMFG and certain of its consolidated subsidiaries adopted the consolidated tax payment system as provided under the Corporation Tax Act.

Changes in accounting principles

For the year ended March 31, 2017

(Adoption of the "Practical Solution on a Change in

Depreciation Method Due to Tax Reform 2016")

In line with revisions to the Corporation Tax Act, from the current fiscal year YMFG has adopted the "Practical Solution on a Change in Depreciation Method Due to Tax Reform 2016" (ASBJ PITF No. 32, June 17, 2016), changing the method for the depreciation of fixtures and buildings acquired on or after April 1, 2016, from the declining-balance method to the straight-line method.

As a result, ordinary income and income before income taxes for the year ended March 31, 2017, each increased by ¥18 million.

Standards and guidance not yet adopted

The following standard and guidance were issued but not yet adopted.

- "Accounting Standard for Revenue Recognition" (ASBJ Statement No. 29, March 30, 2018)
- "Implementation Guidance on Accounting Standard for Revenue Recognition" (ASBJ Guidance No. 30, March 30, 2018)

(1) Overview

The above standard and guidance provide comprehensive principles for revenue recognition. Under the standard and guidance, revenue is recognized by applying following 5 steps:

- Step1: Identify contract(s) with customers.
- Step2: Identify the performance obligations in the contract.
- Step3: Determine the transaction price.
- Step4: Allocate the transaction price to the performance obligation in the contract.
- Step5; Recognize revenue when (or as) the entity satisfies a performance obligation.

(2) Effective date

Effective from the beginning of the fiscal year ending March 31, 2022.

(3) Effects of the application of the standards

The Company and its consolidated domestic subsidiaries are currently in the process of determining the effects of these new standards on the consolidated financial statements.

Additional Information

(Adoption of the "Guidance on Recoverability of Deferred Tax Assets")

YMFG adopted the "Guidance on Recoverability of Deferred Tax Assets" (ASBJ Guidance No. 26, March 28, 2016) from the fiscal year ended March 31, 2017.

(ESOP Trust)

To enhance its welfare benefits, YMFG has introduced the ESOP Trust for Group employees (hereinafter, "Employees")

1. ESOP Trust for Employees introduced in September 2011

(1) Overview of Transactions

Of those Employees enrolled in the Yamaguchi Financial Group Employee Stock Ownership Plan (hereinafter, "YMFG's ESOP"), YMFG has established the trust for those beneficiaries satisfying certain conditions. This trust acquired as a lump sum certain number of shares of YMFG corresponding to the number expected to be acquired by YMFG's ESOP over the five-year period beginning in September 2011. Thereafter, the trust has sold YMFG's shares to YMFG's ESOP each month on a specific date.

(2) Company Shares Residing in the Trust

YMFG's shares residing in the trust are recorded in treasury stock in the net assets section based on the book value of the trust (excluding ancillary expenses). During the current fiscal year, the trust sold all its holdings of YMFG's shares, so the trust held no shares as of March 31, 2017.

(3) Book Value of Borrowings Recorded by Applying the Gross Price Method

The book value of borrowings recorded by applying the gross price method was zero on March 31, 2017.

2. ESOP Trust for Employees introduced in March 2017

(1) Overview of Transactions

Of those Employees enrolled in YMFG's ESOP, YMFG has established the trust for those beneficiaries satisfying certain conditions. This trust acquired as a lump sum certain number of shares of YMFG corresponding to the number expected to be acquired by YMFG's ESOP over the five-year period beginning in March 2017. Thereafter, the trust will sell YMFG's shares to YMFG's ESOP each month on a specific date.

(2) Company Shares Residing in the Trust

YMFG's shares residing in the trust are recorded in treasury stock in the net assets section based on the book value of the trust (excluding ancillary expenses).

The book value and the number of shares of this treasury stock amounted to ¥1,703 million (\$16 million) and 1,323 thousand shares on March 31, 2018 and ¥2,084 million and 1,619 thousand shares on March 31, 2017.

(3) Book Value of Borrowings Recorded by Applying the Gross Price Method

The book value of borrowings recorded by applying the gross price method was ¥1,715 million (\$16million) on March 31, 2018 and ¥2,099 million on March 31, 2017.

(Board Benefit Trust (BBT))

YMFG has introduced a Board Benefit Trust ("BBT") to raise awareness among Subject Directors of Banks within YMFG toward raising operating performance at YMFG over the medium to long term and contributing to increases in corporate value.

(1) Overview of Transactions

Via the trust, YMFG acquires YMFG's common shares using funds provided by YMFG. YMFG's share and cash equivalent to fair value of YMFG's stock measured at the time of retirement are granted to be distributed via the trust to Subject Directors according to Subject Directors' positions, and the level of achievement of operating performance in accordance with directors' stock benefit regulations established by YMFG and Banks within YMFG.

(2) Company Shares Residing in the Trust

YMFG's shares residing in the trust are recorded as treasury stock in the net assets section based on the book value of the trust (excluding ancillary expenses).

The book value and the number of shares of this treasury stock amounted to ¥609 million (\$6 million) and 631 thousand shares on March 31, 2018 and ¥610 million and 633 thousand shares on March 31, 2017.

3. CONSOLIDATED STATEMENTS OF CASH FLOWS AND CASH EQUIVALENTS

In preparing the consolidated statements of cash flows, the Group considers cash and due from THE BANK OF JAPAN as cash and cash equivalents.

The reconciliation of cash and due from banks in the consolidated balance sheets and cash and cash equivalents in the consolidated statements of cash flows at March 31, 2018 and 2017 were as follows:

	Millions of yen		Thousands of U.S. dollars
	2018	2017	2018
Cash and due from banks	¥985,503	¥960,386	\$9,276,195

4. FINANCIAL INSTRUMENTS

Items pertaining to the status of financial instruments

(1) Policies on financial instruments

YMFG provides community-based integrated financial services centered on the banking, securities and credit card businesses. Accordingly, the Group is subject to a variety of risks, including credit risk, market risk and liquidity risk. Due to changes in economic, social and financial conditions, these risks have grown more diverse and complex. Under these conditions, the Group considers strengthening its risk management structure as a priority issue. To maintain and enhance the soundness of its operations, YMFG has created groupwide risk management regulations, which clarify the Group's fundamental stance on risk management.

(2) Content and risks of financial instruments

Of financial assets held by the Group, principally loans and bills discounted extended to business partners are subject to the credit risk of breach of contract. The Group holds securities, principally debt securities, equity securities and investment trusts, for trading purposes, for holding to maturity, for purely investment purposes or to promote positive business relations. These securities are subject to issuer credit risk, interest rate fluctuation risk and market price fluctuation risk.

The Group's financial liabilities center on deposits and negotiable certificates of deposit, and call money that it raises in the market. However, the Group is subject to the liquidity risk of becoming unable to secure necessary funding. The Group is also subject to interest rate risk arising from fluctuations in financial and economic conditions.

The Group employs derivative transactions to hedge underlying market risks on its assets and liabilities. The Group also provides derivatives as financial products to

meet customers' needs. Interest-related and securities-related derivative transactions are employed to limit the impact on income of future interest rate fluctuations and price fluctuations for loans and bills discounted, deposits, securities and other instruments bearing long-term interest at fixed rates. Currency-related derivative transactions are used primarily to avoid fluctuations in income stemming from future exchange rate fluctuations, stabilize funding denominated in foreign currencies, as well as offered as products to clients. With regard to transactions to secure income through changes in market rates, which are conducted on a limited basis, the Group has established stringent standards that include risk limits and loss limits.

As market risk factors, interest rate related and securities-related derivative transactions are subject to the risk of fluctuations in interest rates and prices, and currency-related derivative transactions are subject to exchange rate fluctuations. For transactions that are not conducted on exchanges, the Group is subject to credit risk, the risk of loss in the event a counterparty becomes unable to fulfill its contractual obligations due to deteriorating financial conditions.

With regard to use of hedge accounting, the Group applies deferred hedge accounting after it ensured in advance that the established conditions are satisfied. As for hedging methods, the Group employs the portfolio hedge where certain group of assets with similar risk is identified and such risk is hedged comprehensively. In addition, for certain interest swap contracts, exceptional treatments are applied.

(3) Risk management structure related to financial instruments

(i) Management of credit risk

Through the appropriate operation of a credit rating system, the Group endeavors to determine the financial conditions of business partners and accurately evaluate their credit risk. The Group has enhanced the precision of its credit evaluations, reviewing business partner credit ratings swiftly and appropriately for each financial period and each time their credit conditions change.

The Group conducts self assessments according to stringent standards that are consistent throughout the Group. The Group performs write-off and provisions based on the results of its self assessments. The Group's authentication departments verify the content of such self assessments. Independence is maintained through internal audits conducted by audit departments. In addition,

the Group undergoes external audits conducted by its independent external auditors.

With regard to the screening of individual transactions, the Group employs a screening system suited to each subsidiary bank's size of the business and characteristics to conduct detailed screenings that take individual sector and regional characteristics into consideration. In terms of portfolio management, the Group strives to enhance its risk management by first measuring credit risk, and then managing risk by category, sector and geographic area.

Risk management departments periodically obtain credit information and fair value as a part of managing credit risks on securities issuers and counterparty risks on derivative transactions.

(ii) Management of market risk

Qualitative information on the management of market risk

The Group has formulated a market risk management process that identifies and quantitatively measures market risks. An asset-liability management (ALM) system is employed to control market risk within allowable limits, and the Group ALM Committee is periodically held to respond to such risks.

YMFG periodically evaluates market risk conditions and verifies the appropriateness of risk controls.

Quantitative information on the management of market risk

The market risk (estimated loss amount) of the loans, securities, deposits and derivatives transactions of Yamaguchi Bank, Momiji Bank and Kitakyushu Bank of the Group are calculated according to value at risk (VaR). Furthermore, the covariance method is used to calculate VaR.

As of March 31, 2018, the market risk (estimated loss amount) of Yamaguchi Bank was ¥79,408 million (\$747 million), the market risk (estimated loss amount) of Momiji Bank was ¥20,766 million (\$195million) and the market risk (estimated loss amount) of Kitakyushu Bank was ¥27,258 million (\$257 million). Also, as of March 31, 2017, the market risk (estimated loss amount) of Yamaguchi Bank was ¥80,793 million, the market risk (estimated loss amount) of Momiji Bank was ¥25,142 million and the market risk (estimated loss amount) of Kitakyushu Bank was ¥17,293 million.

Assumptions used in calculating VaR include a holding period of three months (however, one year for a holding period for shares held for the purpose of strategic investment), a confidence interval of 99.9% and an observation period of five years.

Yamaguchi Bank, Momiji Bank and Kitakyushu Bank conduct back-testing to compare the VaR calculated by the model with the actual losses. However, because of relatively large fluctuations in Japanese stock and foreign exchange market prices, instances arose in which they were unable to capture the risk on Japanese stocks and foreign bond funds. Consequently, from fiscal 2016, to determine the amount of risk on Japanese stocks and foreign bond funds, VaR is measured for observation periods of both one year and five years, and the larger number is taken as the risk amount. As of March 31, 2018, the VaR observation period was five years for both Japanese stocks and foreign bond funds.

However, as the practice of measuring market risk amount with a set risk probability calculated on the basis of historical market fluctuations remains unchanged even after revising the measurement method to appropriately capture the market risk amount, in some cases it is not possible to capture market risk in the event of sudden changes in the market environment outside the normally expected scope.

(iii) Management of liquidity risk related to fundraising

The majority of funds is raised through deposits, which constitute a stable base for procuring funds. The Group manages funds on the basis of elaborate forecasts, confirming cash flows primarily through the management of financial balances using short-term financial markets.

For cash flow management, the Group strives to manage the liquidity risk by ensuring stability, preparing for unexpected events, and maintaining highly liquid assets.

(4) Supplementary explanation of items pertaining to the fair value of financial instruments

The fair values of some financial instruments are based on market prices. The fair values of other instruments, for which market prices are not readily available, are based on rational calculation. However, as assumptions are used in these calculations, different assumptions can yield different values.

Items pertaining to the fair value of financial instruments

The table below indicates the consolidated balance sheet amounts of financial instruments, as well as their fair values and the differences between the two. Line items with little significance to balance sheet amounts have been omitted.

Unlisted equity securities and other instruments for which fair value is not easily determinable are not included in the table below. (Refer to (Note 2).)

(Note 1) Methods of calculating the fair value of financial instruments

(1) Assets

(i) Cash and due from banks

As the settlement term of these instruments is short (within one year) and their fair values and book values are approximately the same, their book values are taken as their fair values.

(ii) Call loans and bills purchased

As the settlement term of these instruments is short (within one year) and their fair values and book values are approximately the same, their book values are taken as their fair values.

(iii) Money held in trust

As for the securities held as trusted assets in money held in trust established independently for the purpose of investing mainly in the securities of the Group, the value on stock exchanges is taken as fair value for the equity securities, and either the value on exchanges or a price indicated by other financial institutions dealing with the specific instruments is taken as fair value.

Notes pertaining to money held in trust exchanges for the purpose of holding are indicated within "Money held in trust."

(iv) Securities

For equity securities, fair value is determined by stock exchange prices; the fair value of debt securities is determined by exchange prices or prices received from information vendors. Fair values of investment trusts are determined by exchange prices or standard prices disclosed by investment trust management companies.

The fair value of private placement bonds guaranteed by Yamaguchi Bank and Momiji Bank is determined for each internal rating category and period by discounting the total amount of interest and principal to their present value, using as the discount rate the risk-free rate plus the credit cost determined for each internal rating category. However, fair value of bonds of legally bankrupt debtors, substantially bankrupt debtors and debtors in danger of bankruptcy is determined by deducting the expected amount of loss on the bond by using the same method applied to loans from the bond's face value.

(v) Loans and bills discounted

For loans and bills discounted with floating interest rates, as in the short term their values reflect market interest rates, unless the credit status of the obligor has changed significantly since the loans were extended, their fair value is similar to their book value, so their book value is taken as their fair value.

For loans and bills discounted bearing fixed interest rates, fair value is determined for each internal rating category and period by discounting the total amount of interest and principal to their present value, using as the discount rate the risk-free rate for operating loans and bills discounted plus the credit cost for each internal rating category. For consumer loans and bills discounted, fair value is determined by discounting the total amount of interest and principal to their present value using the assumed interest rate on new loans of the same type. For instruments having a short settlement period (within one year), as their fair values and book values are approximately the same, their book value is taken as their fair value.

With regard to loans to legally bankrupt obligors, substantially bankrupt obligors or obligors who are in danger of bankruptcy, the estimated collectible amount is based on either the present value of estimated future cash flows or the expected amounts recoverable from the disposal of collateral and/or under guarantees. As the fair value is essentially equivalent to the amount after deducting the allowance for possible loan losses from the book value as of the consolidated balance sheet date, this amount is taken as fair value.

For loans that have no specific repayment period, as the fair value is assumed to be equivalent with the book value according to the expected payment dates and interest rates, book value is taken as the fair value.

(2) Liabilities

(i) Deposits and (ii) Negotiable certificates of deposit

The fair value of demand deposits is determined as the payment amount if payment were required on the consolidated balance sheet date (book value). The fair value of time deposits is determined by discounting future cash flows to their present value by certain time periods. The discount rate employed is the interest rate required for newly accepted deposits. For deposits having a short period (within one year), as their fair values and book values are approximately the same, their book value is taken as their fair value.

(3) Derivative transactions

The fair value of derivative transactions, comprising interest-rate-related transactions (such as interest rate futures, interest rate options and interest rate swaps) currency-related transactions (such as currency futures, currency options and currency swaps), bond-related transactions (such as bond futures and bond options) is taken as their value on exchanges, discounted present value or price as calculated using option pricing models.

Interest rates swaps that employ exceptional accounting treatment are accounted for as part of the loans and bills discounted that are hedged. Therefore, their fair value is included in the fair value of loans and bills discounted.

(Note 2) The consolidated balance sheet amounts of financial instruments for which market prices are not readily available

Financial instruments for which market prices are not readily available are not included in "Assets (4) Available-for-sale securities."

Impairment losses on securities

Regarding securities (excluding those for which market prices are not readily available) other than trading securities, if their market values have fallen substantially below their acquisition price and are not expected to recover to the acquisition price, such market values are recorded as the consolidated balance sheet amounts. The valuation difference is recorded as a loss for the fiscal year in which such difference is realized (hereinafter, "impairment losses").

During the fiscal year ended March 31, 2018, impairment losses were ¥463 million (\$4,358 thousand) on equity securities and during the fiscal year ended March 31, 2017, impairment losses totaled ¥103 million on equity securities. The basis for determining whether the market value has fallen significantly is as follows.

If the market value of the securities in general has fallen by 30% or more compared with the acquisition cost, the value of the securities is determined to have "fallen significantly." However in the case of shares and equivalent securities, if their market value has fallen by 30% or more but less than 50% of the acquisition cost, the determination of whether the value has "fallen significantly" takes into consideration other factors such as the issuing company's credit risk (independent debtor classification, external ratings, etc.) and previous percentage decreases over a specific period of time in the past.

7. LOANS AND BILLS DISCOUNTED

Loans at March 31, 2018 and 2017 include "Risk-Managed Loan Amounts" as follows:

- (1) Loans to borrowers in bankruptcy amounting to ¥13,712 million (\$129million) and ¥14,652 million denote loans subject to Article 96-1-3 and 96-1-4 of "Order for Enforcement of the Corporation Tax Act" (Cabinet Order No. 97 of 1965) on which interest accrual has stopped as there is doubt about the collectability of either principal or interest because they have been contractually past due for a considerable period of time or for other reasons.
- (2) Other delinquent loans amounting to ¥62,612 million (\$590 million) and ¥65,203 million denote loans on which the Banks have stopped accruing interest excluding loans to borrowers in bankruptcy and loans on which interest payments are deferred in order to promote recovery of borrowers in economic difficulty.
- (3) Loans past due for three months or more amounting to ¥986 million (\$9 million) and ¥471 million denote loans where payment of interest or principal has been delayed for three months or more excluding loans to borrowers in bankruptcy and other delinquent loans.
- (4) Restructured loans amounting to ¥12,105 million (\$114 million) and ¥10,039 million denote loans to borrowers for which the repayment terms have been modified to more favorable terms including reduction of interest rate, deferral of interest payments, extension of principal payments and debt forgiveness with the objective of promoting recovery of borrowers in economic difficulty excluding loans to borrowers in bankruptcy, other delinquent loans, and past-due loans.
- (5) The total of loans to borrowers in bankruptcy, other delinquent loans, past-due loans, and restructured loans amounted to ¥89,415 million (\$842 million) and ¥90,365 million.

The loan amounts disclosed from (1) to (5) above are amounts before deducting an allowance for loan losses.

Commercial bills

Bills discounted are accounted for as financing transactions in accordance with the Industry Audit Committee Report

No. 24, February 13, 2002, of the JICPA, although the Banks have the right to sell or pledge them without restrictions. The total face value of commercial bills and purchased foreign exchange bills obtained as a result of discounting was ¥47,022 million (\$443 million) at March 31, 2018 and ¥40,304 million at March 31, 2017.

Loan Participation

Based on "Accounting Treatment and Presentation of Loan Participation," (Japanese Institute of Certified Public Accountants Accounting System Committee Report No. 3, November 28, 2014), the consolidated balance sheet amount of loan participation agreements in which the Banks have acquired the economic benefits and risks of the underlying loans from the original lender was ¥4,454 million (\$42 million) as of March 31, 2018 and there was no such item as of March 31, 2017.

8. COMMITMENT LINES

Loan agreements and commitment line agreements relating to loans are agreements that oblige the consolidated subsidiaries to lend funds up to a certain limit agreed in advance. The consolidated subsidiaries make the loans upon the request of an obligor to draw down funds under such loan agreements as long as there is no breach of the various terms and conditions stipulated in the relevant loan agreement. The unused commitment balance relating to these loan agreements amounted to ¥925,546 million (\$8,712 million) at March 31, 2018 and ¥917,600 million at March 31, 2017. Of this amount, ¥808,080 million (\$7,606 million) at March 31, 2018, and ¥834,969 million at March 31, 2017, relates to loans for which the term of the agreement is one year or less, or unconditional cancellation of the agreement is allowed at any time.

In many cases the term of the agreement runs its course without the loan ever being drawn down. Therefore, the unused loan commitment will not necessarily affect future cash flows. Conditions are included in certain loan agreements that allow the consolidated subsidiaries either to decline the request for a loan draw-down or to reduce the agreed limit amount when there is due cause to do so, such as when there is a change in financial condition or when it is necessary to protect the consolidated subsidiaries' credit. Consolidated subsidiaries take various measures to protect their credit. Such measures include

having the obligor pledge collateral to the consolidated subsidiaries in the form of real estate, securities, etc., at entering into a loan agreement or in accordance with the consolidated subsidiaries' established internal procedures for confirming the obligor's financial condition, etc., at regular intervals.

9. PLEDGED ASSETS

At March 31, 2018 and 2017, the following assets were pledged as collateral for certain liabilities of the Banks.

	Millions of yen		Thousands of U.S. dollars
	2018	2017	2018
Cash and due from banks	¥ 14	¥ 18	\$ 132
Securities	279,594	247,444	2,631,720

The collateral was pledged to secure the following:

	Millions of yen		Thousands of U.S. dollars
	2018	2017	2018
Deposits	¥26,832	¥36,332	\$252,560
Call money	26,560	11,219	250,000
Payables under securities lending transactions	46,884	32,861	441,303

In addition, securities not included in the above schedules were pledged as collateral for operating transactions, such as foreign exchange contracts and forward exchange contracts. These securities amounted to ¥72,627 million (\$684 million) at March 31, 2018 and securities amounted to ¥104,578 million and cash and due from banks ¥3 million at March 31, 2017.

Also, other assets included security deposits, collateral pledged for transactions involving public funds, collateral pledged for financial instruments, collateral pledged for exchange settlements and the financial futures margin, as indicated below.

	Millions of yen		Thousands of U.S. dollars
	2018	2017	2018
Deposits	¥3,212	¥2,728	\$30,233
Collateral pledged for transactions involving public funds	1,189	1,189	11,192
Collateral pledged for financial instruments	7,693	2,335	72,412
Collateral pledged for exchange settlements	68,410	9,595	643,919
Financial futures margin	10	—	94

10. ACCUMULATED DEPRECIATION

Accumulated depreciation of tangible assets was ¥72,359 million (\$681 million) at March 31, 2018, and ¥72,422 million at March 31, 2017.

11. ADVANCED DEPRECIATION AMOUNT OF TANGIBLE FIXED ASSETS

At March 31, 2018 and 2017, advanced depreciation amount of tangible fixed assets were ¥7,780 million (\$73 million) and ¥7,813 million. Corresponding amount depreciated from certain tangible fixed assets in fiscal year ended March 31, 2017 were ¥108 million and there were no amount in fiscal year ended March 31, 2018.

12. IMPAIRMENT LOSSES

During the fiscal year ended March 31, 2018 and 2017, impairment losses were recorded on the following assets.

Location	Primary use	Type	Impairment loss		
			Millions of yen		Thousands of U.S. dollars
			2018	2017	2018
Within Yamaguchi Prefecture	Business-use assets	Buildings, movable property, software	¥ 13	¥—	\$ 122
Within Hiroshima Prefecture	Business-use and Idle assets for sale	Land, buildings, software	¥210	¥50	\$1,977
Other	Business-use assets	Buildings, movable property	¥ 2	¥19	\$ 19
Total			¥225	¥69	\$2,118

YMFG and its consolidated subsidiaries that engage in the banking and securities business group their business-use assets into the smallest units possible from the standpoint of management accounting, which is the branch. Idle assets are, in principle, grouped as units of individual assets. In addition, corporate headquarters, administrative centers, training facilities, company housing and dormitories are considered corporate assets, as these are related to all the consolidated subsidiaries which are engaged in the banking businesses.

Consolidated subsidiaries that do not engage in the banking and securities business group their assets, in principle, on an individual company basis.

In the fiscal year ended March 31, 2018 and 2017, the book values of the business-use and idle assets, which have problem in operating cash flow are reduced to their recoverable values, and recognized the reduction of ¥225 million (\$2,118 thousand) and ¥69 million as impairment losses. This amount includes land of ¥81 million (\$762 thousand), buildings of ¥47 million (\$443 thousand), movable property of ¥1 million (\$9 thousand) and software of ¥96 million (\$904 thousand) in fiscal year ended March 31, 2018, and land of ¥31 million and buildings of ¥38 million in fiscal year ended March 31, 2017.

The recoverable amount used to estimate the impairment loss for the fiscal year ended March 31, 2018 and 2017, is the net selling price, which is calculated by deducting the expected disposal cost from the expected disposal value.

13. BORROWED MONEY

Payment schedule of borrowed money as of March 31, 2018 is as follows:

	Millions of yen	Thousands of U.S. dollars
2018	¥11,114	\$104,612
2019	5,283	49,727
2020	4,228	39,797

2022	1,533	14,430
Thereafter	4,496	42,319
Total	¥29,799	\$280,488

14. PROVISION FOR EMPLOYEE RETIREMENT BENEFITS

Overview of severance payments and pension plans
YMFG and some consolidated subsidiaries employ funded and unfunded defined benefit and defined contribution plans as employee retirement benefits.

Defined benefit plans include defined benefit corporate pension plans and lump-sum retirement plans. Also, some are established as retirement benefit trusts.

Some consolidated subsidiaries employ the simplified method for calculating retirement benefit obligations.

15. REVALUATION RESERVE FOR LAND

Pursuant to the Law concerning Revaluation of Land (Law No. 34, promulgated March 31, 1998, the "Law"), YMFG revalued certain land used for banking operations by consolidated subsidiaries. The tax-equivalent portion of this revaluation amount was recorded in liabilities under "deferred tax liabilities for revaluation reserve for land," and the remainder under net assets as "revaluation reserve for land."

Revaluation date: March 31, 1998

Item 3, Article 3, of the Law establishes the evaluation method as that prescribed by Article 2-4 of the Order for Enforcement of Law on Revaluation of Land (Enforcement Order No. 119, promulgated March 31, 1998), and the amount of land tax is calculated on the basis of the land tax amount specified under Article 16 of the Land-holding Tax Act, adjusted rationally in accordance with the basis of calculation announced officially by the Director General of the National Tax Administration Agency.

Total difference between market value of land for business use revalued in accordance with Article 10 of the Law and the total post-revaluation book value of land at March 31, 2018 and 2017 were ¥21,391 million (\$201 million) and ¥22,589 million, respectively.

16. CONTINGENT LIABILITIES — ACCEPTANCES AND GUARANTEES

All contingent liabilities, including letters of credit, acceptances and guarantees are reflected in acceptances and guarantees. As a contra account, customers' liabilities for acceptances and guarantees are shown on the asset side, which represent the Banks' right of indemnity from customers

17. OTHER INCOME

Other income for the fiscal year ended March 31, 2018 and 2017 included the gains on sale of stock of ¥11,251 million (\$106 million) and ¥11,802 million, respectively.

2. Significant differences between the statutory effective tax rate and the actual income tax rate after application of deferred income tax accounting for the year ended March 31, 2018 and 2017 were omitted, as the difference between the effective statutory tax rate and the actual tax rate after application of deferred income tax accounting were 5% or less of the effective statutory tax rate.

3. Revisions in amounts of deferred tax assets and liabilities due to changes in the corporate tax rate
For the year ended March 31, 2017

The “Act for Partial Revision of Acts, Including Partial Revision of the Consumption Tax Act for the Fundamental Reform of the Taxation System to Achieve a Stable Source of Revenue for Social Security” and the “Act for Partial Revision of Acts, Including Partial Revision of the Local Tax Act and the Local Allocation Tax Act for the Fundamental Reform of the Taxation System to Achieve a Stable Source of Revenue for Social Security” were enacted by the Japanese government on November 18, 2016. In

conjunction with these acts, the effective statutory rate used in calculating deferred tax assets and liabilities for the fiscal year ended March 31, 2017, has changed from that used for the fiscal year ended March 31, 2016.

As a result, deferred tax assets increased by ¥37 million and deferred income taxes decreased by the same amount.

22. NET ASSETS

Under the Companies Act of Japan (“the Act”), the entire amount paid for new shares is in principle required to be designated as common stock. However, a company may, by a resolution of the Board of Directors, designate an amount not exceeding one-half of the price of the new shares as additional paid-in capital, which is included in capital surplus.

Under the Act, in cases where dividend distribution of surplus is made, the smaller of an amount equal to 10% of the dividend or the excess, if any, of 25% of common stock over the total of additional paid-in capital and legal earnings reserve must be set aside as additional paid-in capital or legal earnings reserve. Legal earnings reserve is included in retained earnings in the accompanying Consolidated Balance Sheets.

Under the Act, legal earnings reserve and additional paid-in capital may be used to eliminate or reduce a deficit, or may be capitalized, by a resolution of the shareholders’ meeting.

Under the Act, additional paid-in capital and legal earnings reserve may not be distributed as dividends, however all of these may be transferred to other capital surplus and retained earnings, respectively, which are potentially available for dividends.

The maximum amount that YMFG can distribute as dividends is calculated based on the Non-Consolidated Financial Statements of YMFG in accordance with the Act.

At the annual shareholders’ meeting, held on June 26, 2018, the shareholders approved cash dividends amounting to ¥2,488 million (\$23 million). Such appropriations have not been accrued in the Consolidated Financial Statements as of March 31, 2018 and to be recognized in the period in which they are approved by the shareholders.

At the annual shareholders’ meeting, held on June 28, 2017, the shareholders approved cash dividends amounting to ¥1,989 million. Such appropriations have not

been accrued in the Consolidated Financial Statements as of March 31, 2017 and to be recognized in the period in which they are approved by the shareholders.
