Economies and Industries of Yamaguchi Prefecture, Hiroshima Prefecture, and Kitakyushu City (Reference)

	Yamaguch	i Prefecture	
Excellent industrial concentration • Many plants of major corporations located owing to the excellent transportation network • Concentration of primary material industries such as cement and chemicals owing to the rich mineral resources • Increasing entries of processing and assembly industries such as transportation machinery and more recently the pharmaceutical industry	Gateway to exchanges with Asia	Rich industrial human resources • Excellent historical background that has traditionally nurtured the social climate encouraging study and education	Major companies and plants in Yamaguchi Prefecture • Ube Industries Ltd. (cement, chemicals) • Tokuyama Corporation (cement, chemicals) • Chofu Seisakusho Co., Ltd. (metal products) • Mitsubishi Heavy Industries, Ltd. (shipbuilding) • Bridgestone Corporation (rubber) • Nippon Steel & Sumikin Stainless Steel Corporation (steel pipes) • Tosoh Corporation (chemicals)
	Hiroshima	Prefecture	
The largest industrial prefecture in the Chugoku and Shikoku regions • Growth of heavy industries, particularly transportation machinery such as automobiles and shipbuilding, leveraging the technological strength developed through military manufacturing • Ranks No. 12 in Japan in terms of nominal gross prefectural product with a share of 2.3% in Japan.	Manufacturing industry centered around Mazda Motor Corporation • The formation of a group of broad-based automobile-related companies with Mazda Motor Corporation on top of the hierarchy • The shipbuilding industry encompassing middle-ranking and small and medium-sized shipbuilding companies and related manufacturers such as pumps and turbines, which holds the No. 1 share in Japan • Additional concentration of traditional industry and the manufacturing of furniture for newlywed couples	Home of many No. 1 enterprises • Many local enterprises in a variety of industries with nationwide reputation and a large domestic market share through leveraging excellent technologies (Refer to the right section)	Major companies and plants in Hiroshima Prefecture • Mazda Motor Corporation (automobile) • Tsuneishi Holdings Corporation (shipbuilding) • Ryobi Limited (non-ferrous metal) • JMS Co., Ltd. (medical equipment) • Molten Corporation (athletic balls) • Aoyama Trading Co., Ltd. (menswear)
	Kitakyu	shu City	
 Concentration of a variety of industries Kitakyushu City was born in 1963 through a merger of 5 cities. Mainly heavy and chemical industries (steel in the main) New concentration of increasingly diverse industries such as autorelated industries due to the proximity to Asia and the highly developed logistics infrastructure 		 Environmental and energy industries A forerunner of the eco- town business leveraging the concentration of industrial technology with broad manufacturing bases Research and development is conducted on new energy sources such as the technology to reduce the oxygen content under the promotion system developed through the industry-academic- public coordination 	Major companies and plants in Kitakyushu City • Nippon Steel & Sumitomo Metal Corporation (iron manufacturing, steel) • TOTO Ltd. (construction equipment) • Mitsubishi Chemical Corporation (petrochemical functional products) • Yasukawa Electric Corporation (industrial robots) • Mitsui High-tec, Inc. (semiconductor-related products) • Zenrin Co., Ltd. (information and communication)
